

C1

3. (Twice Amended) An anti-microbial product according to claim 2, characterised in that the antiperspirant active and the iron (III) chelator are both present in the same composition.

C2

5. (Amended) An anti-microbial product according to claim 2, having a hardness such that the pressure required to penetrate the composition is less than 0.06 N mm⁻².

9. (Three Times Amended) An anti-microbial composition according to claim 3, wherein the antiperspirant active is an aluminium halohydrate.

C3

10. Amended) An anti-microbial product according to claim 2, wherein the iron (III) chelator has a binding coefficient for iron (III) or greater than 10²⁶.

12. (Three Times Amended) An anti-microbial product according to claim 2, wherein the iron (III) chelator has an acid form comprising at least five acid groups.

C4

13. (Three Times Amended) An anti-microbial product according to claim 2, wherein the iron (III) chelator is a polyaminocarboxylic acid or salt thereof.

14. (Twice Amended) An anti-microbial product according to claim 13, wherein the iron (III) chelator has the acid form diethylenetriaminepentaacetic acid triethylenetetraaminehexaacetic acid, or ethylenebis {2-(2-hydroxyphenyl) glycine}.

C5

23. (Amended) An anti-microbial product according to claim 14, wherein the iron (III) chelator is diethylenetriaminepentaacetic acid or a salt thereof.

Please cancel claims 4 and 11.
